

## **MICROFLOCKER** FLOCK SPRAYING EQUIPMENT

- The Microflocker offers the flexibility of our larger systems in a lower power more economic package.
- The output voltage has ten settings allowing the flocking rate to be set to suit the job and flock being used.
- It is ideally suited to flocking the smaller jobs.
- Two sizes of applicators are available as standard, each with quick change flock hoppers making colours changes instantaneous.
- The generator can be powered using the included mains adaptor, an external 12Vdc supply or an internal 9V battery.
- The system is supplied complete with a footswitch and earth lead.

<b>INPUT SUPPLY</b>	110 to 240 Vac / 12Vdc / 9V PP3
<b>OUTPUT VOLTAGE</b>	Adjustable to 45 KV
<b>OUTPUT CURRENT (A)</b>	Up to 45uA
<b>OUTPUT VOLTAGE POLARITY</b>	(-) Negative
<b>REMOTE SWITCHING CONTROL</b>	Via footswitch, Microswitch etc.
